-

Technical Experience

CorvoStore: an in-memory key-value store with optional persistence, written in a NodeJS context. An experimental project inspired by Redis, CorvoStore supports many of Redis's complex data types and matches its time-complexity benchmarks for store operations.

TrumpKu: a webpage that displays a five-seven-five haiku generated semi-randomly from transcripts of Donald Trump's inaugural address and speeches on the campaign trail.

Languages and Technologies

Ruby, JavaScript, SQL, PostgreSQL, Ruby on Rails, React, Redis

Education

Williams College / Bachelor of Arts in History

Fall 2008 - Spring 2012

- Graduated cum laude 2012, Bachelor of Arts in History
- GPA: 3.73
